

MITSUBISHI

CEDIA

◆ MITSUBISHI'S CEDIA sedan has a sporting heritage. Its vehicle dynamics are focused on handling and manoeuvrability, making it a treat to drive. However, Mitsubishi hasn't forgotten that it's a road car and have provided a powerful air conditioning system to keep the soul behind the wheel happy even in hot regions. The Cedia's cabin temperature dropped down to 25.4 degree Celsius while the lowest vent temperature we recorded was 7.8 degree Celsius.
