

Pajero Sport coming to India

MITSUBISHI IS LAUNCHING THE NEW Pajero Sport in India in a month's time. Like the Fortuner is to Toyota, Pajero Sport is Mitsubishi's SUV for the emerging markets. This seven-seater SUV is based on the Triton's ladder frame chassis. We drove the car in 2010 and were impressed with its off-road ability and high quality interiors. However that was

two years back and the interiors might now seem dated against today's competition. The car we drove had a 3.2-litre diesel engine from the Montero good for 165PS and 351Nm of torque. However Mitsubishi might bring it with the 140PS 2.5-litre turbo diesel mill from the Thai spec car. The Pajero Sport will get a manual transmission and 4x4 with low range. We expect the Pajero Sport to be priced at ₹ 21 lakh at which point it will give the Fortuner some stiff competition.
