# PAJERO SPORT FINALLY IN INDIA

**T**rying to cash in on its SUV legacy, Mitsubishi and Hindustan Motors together launched the Pajero Sports. A completely new model in comparison to the old one, the SUV offers a new look which is backed by robust build quality that has been the USP of this machine. Featuring a 2.5 litre, 16 Valve intercooled turbocharged DOHC common rail Di-D engine, the new Pajero churns out 176 bhp with 400 Nm of torque. With super 4 wheel drive facility on offer, it features rear stabilizer and a turning radius of 5.6 metres.

As far as the features list goes, the latest avatar offers driver and passenger airbags, leather-wrapped gear knob, a USB-equipped music player and a multi-information

display and ABS with EBD to name a few. It also offers a third row of seats at the rear enabling it to be a seven seater. With bookings already open, the new Pajero Sport is priced at ₹23.53 lakh ex-showroom Delhi. Available as a CBU

unit initially, the company has plans to manufacture it at their Chennai plant in the coming months. Therefore one could expect a reduction in prices once when it's producing starts. As for the old Pajero, the company would be phasing out the model very soon.
